

# Special Grid Code Review Panel

14 March 2019

# Welcome

## Introductions and Apologies

nationalgridESO

# GC0122 – Amending references to NGET and the Company within the Grid Code following previous modifications

Greg Heavens  
NGESO

# Modification Summary

## Defect

Following GC0120 proposal a number of outstanding inaccuracies still remain in the Grid Code. GC0122 looks to correct the inaccuracies so following implementation of legal separation (GC0112) the Grid Code will be correct.

## Solution

This modification seeks to make the previous changes identified by GC0120 and similar changes to the Demand Response Services and European Connection Conditions; however, references to “Relevant Transmission Licensee” are omitted and in their place, it is proposed that these revert to “NGET” as they were originally.

The following sections of the Grid Code will be affected by this modification:

(full details are set out in the table in section 2 of the Proposal Form and the legal text)

- Glossary and Definitions
- Connection Conditions
- European Connection Conditions
- Balancing Code 1
- Balancing Code 4
- Data Registration Code
- General Conditions
- European Compliance Process
- Demand Response Services

## Proposer Recommended Governance Route

The Proposer recommends that this modification follows the fast track self-governance route.

## Proposer Recommended Timeline

Date	Activity
14 March 2019	Draft Grid Code Modification Fast Track Proposal Report presented to the Grid Code Panel
14 March 2019	Publish approved Grid Code Modification Fast Track Report
4 April 2019	Appeal window closes
5 April 2019	Code Administrator to implement GC0122

# Does the Panel agree that GC0122 meets the Self Governance Criteria?

## Self-Governance Criteria

A proposed Modification that, if implemented,

- (a) is unlikely to have a material effect on:
  - (i) existing or future electricity consumers; and
  - (ii) competition in the generation, distribution, or supply of electricity or any commercial activities connected with the generation, distribution or supply of electricity; and
  - (iii) the operation of the National Electricity Transmission System; and
  - (iv) matters relating to sustainable development, safety or security of supply, or the management of market or network emergencies; and
  - (v) the Grid Code's governance procedures or the Grid Code's modification procedures, and
  
- (b) is unlikely to discriminate between different classes of Users

# Does the Panel agree that GC0122 meets the Fast Track Criteria? (must be unanimously agreed by the Panel)

## Fast Track Criteria

A proposed Grid Code Modification Proposal that, if implemented,

- (a) would meet the Self-Governance Criteria; and
- (b) is properly a housekeeping modification required as a result of some error or factual change, including but not limited to:
  - (i) updating names or addresses listed in the Grid Code;
  - (ii) correcting any minor typographical errors;
  - (iii) correcting formatting and consistency errors, such as paragraph numbering; or
  - (iv) updating out of date references to other documents or paragraphs

## Next Steps

Assuming the Panel agrees this is a fast track self-governance modification:

- Approved Grid Code Fast Track Report will be published on 14 March 2019 (15 working day appeal window opens)
- Appeal window closes on 4 April 2019
- Subject to no objections, GC0122 will be implemented on 5 April 2019
