

Grid Code Panel Headline Report

25 April 2019

The Grid Code Review Panel Headline Report is produced after every Grid Code Review Panel (the Panel) and aims to provide an overview of the key decisions made.

Approval of 28 March Minutes

The minutes from the Panel meeting held on 28 March 2019 were approved subject to the incorporation of amendments requested by Panel members. This will be shortly available on National Grid ESO website [here](#).

Prioritisation Stack

Please see Annex 1

Modification Proposals & Panel Vote

There were two New Modification Proposals for consideration

GC0127 – EU Code Emergency & Restoration: Requirements resulting from System Defence Plan

The Panel voted unanimously that GC0127 did not meet the Self Governance criteria and agreed the modification should proceed via the Standard Governance route with a Workgroup.

GC0128 - EU Code Emergency & Restoration: Requirements resulting from System Restoration Plan

The Panel voted unanimously that GC0128 did not meet the Self Governance criteria and should proceed via the Standard Governance route with a Workgroup.

New/Pending Authority Decision

GC0118 – Modification to the Grid Code to accommodate the recent Distribution Code modification to Engineering Recommendation P28 –Voltage fluctuations and the connection of disturbing equipment to transmission systems and distribution networks in the UK

GC0118 is pending an Authority decision

GC0114 - System Operation Guideline: Prequalification Processes

GC0114 is pending an Authority decision

Workgroup Reports

GC0096 – Energy Storage

The Panel agreed the Workgroup had met the Terms of Reference and GC0096 should proceed to the Code Administrator Consultation

Grid Code Review Panel Prioritisation Stack

Annex 1

Section GR3.2 (b) Without prejudice, the Grid Code Review Panel shall endeavour at all times to operate. (i) in an efficient, economical and expeditious manner, taking account of the complexity, importance and urgency of particular Grid Code Modification Proposals. (ii) and with a view to ensuring that the Grid Code facilitates achievement of the Grid Code Objectives.	
Complexity	The defect addressed by the proposed has implications for many different areas of the energy system which need to be taken into consideration throughout the process. The technical complexity and cross code impact of the modification will most likely require significant use of industry time and a higher than average number of workgroups to conclude the process.
Importance	The perceived value & risk associated with the proposed modification. The value / risk could be considered from a number of different perspectives i.e. financial / regulatory / licence obligations both directly for customer and end consumers more generally.
Urgency	A proposed modification which requires speedy consideration within the code governance process, as well as the timescales for implementation within the respective code.
