Energy Imbalance

- Positive Reserve (Op Res + STOR)
- Negative Reserve (Footroom)
- Frequency Control (Response + Fast Reserve)
- Other Reserve (Ancillary Costs Only)
- Constraints (BM & Trades only)
- Other (Reactive + Black Start + BM & AS General)

Commentary

45 47

> The market was short in excess of 1200MW over the morning peak, when trades on the interconnectors were taken for downward regulation and positive margin. In the late evening, around 500MW of STOR was run to account for a sudden demand drop.

Overnight, voltage levels in England were regulated with BM actions and RoCoF was secured with trades on interconnectors.
