

Code Administrator Meeting Summary

Meeting Name

CMP317 Identification and exclusion of Assets Required for Connection when setting Generator Transmission Network Use of System (TNUoS) charges

Date: 2 October 2019

Contact Details

Chair: Rob Marshall

Contact details: Rob.Marshall@nationalgrideso.com
07824 518958

Proposer: Harriet Harmon, National Grid ESO
Harriet.Harmon@nationalgrideso.com

Key areas of discussion

The Workgroup discussed the following:

- The workgroup considered a paper from RWE Npower in relation to the development of the legal text and possible solutions.
- The workgroup further explored suggested definitions for exclusions, put forward by the workgroup member from SSE. Whilst some definitions were agreed, there were other areas which need further exploration by the workgroup.
- Discussions were also held in regards to possible reconciliation processes. This involved:
 - How potential changes would impact on the €0-2.50mwh generation cap
 - How any overcharging or under payment could be recovered, or paid back
 - The timescales for an reconciliation process e.g. immediate following the charging year as a part of existing reconciliation processes or in a following charging year as an adjustment to charges

The Workgroup agreed that the following next steps:

- The workgroup would indicate their availability for the next workgroup, to be held in November in order to work towards the workgroup consultation.

Actions Log

Number	Action	Status
5	ESO to send out latest MITS Map	Open
8	Ofgem to provide a summary of any views they hold that are relevant to this modification	Open
9	ESO to update diagrams shared with workgroup showing physical assets required for connection	Open
10	GG and JT to look at definition for assets require for connection	Open
