

STCP 19-4 Commissioning

Mark O'Connor

May 2014

Issue

Campbell McDonald raised a concern with the System Operate on 28th March 2014 on behalf of SSEGEN about why SSE Generation had not received any of the recent commissioning plans in a timely manner as per the STCP 19-4 commissioning procedure.

SSE Generation listed 4 recent commissioning site

- Fasnakyle
- Corriemoillie and Luch Luicahart Windfarm
- Sloy
- Clachan

SSE generation raised concern with the impact of not being involved on cross boundary safety, system diagrams, nomenclature, site responsibility schedules, impacts on the clause 10's and affect on generation plant.

Governance

The STCP has requirements on all parties to involve all interested parties in meeting, documentation.

There has also been discussion between SHET, SPT and NGET about the STCP19-4 and the level of comments / level of responsibility each party has on the documentation.

Proposal

Pending discussion at the STC Modification Panel the proposal is to set up a working group to review STCP 19-4 processes and working practices, to address the customer, SHET, SPT and NGET concerns.
