- Negative Reserve (Footroom)
- Frequency Control (Response + Fast Reserve)
- Other Reserve (Ancillary Costs Only)
- Constraints (BM & Trades only)
- Other (Reactive + Black Start + BM & AS General)

Commentary

The market was variable throughout the day with a long peak approaching midnight at the end of the day. Trades on Interconnectors were made between 7am and 9am for margin.

Strong winds across the UK required BM Actions to restrict flow between Scotland and England. Interconnector trades were made for RoCoF. BM Actions were carried out for voltage support in the South East, Midlands, and Wales.
