

CUSC Special Panel Headline Report

6 August 2021

Connection and Use of System Code (CUSC) Panel

The CUSC Panel Headline Report is produced after every CUSC Panel and aims to provide an overview of the key decisions made. Minutes for this meeting will be published separately.

Workgroup Reports

CMP368/369 'Updating Charges for the Physical Assets Required for Connection, Generation Output and Generator charges for the purpose of maintaining compliance with the Limiting Regulation (CMP368) and Consequential changes to Section 14 of the CUSC as a result of the updated definitions introduced by CMP368 (CMP369)'

CMP368 seeks to give effect to the Authority determination within the CMP317/327 decision published on the 17 December 2020 to amend the definition of Assets Required for Connection, create new definitions of 'GB Generation Output' and define Generator charges for use in the Limiting Regulation range calculation.

To facilitate the change, CMP369 proposes to update the legal text relating to 'Generation Output' detailed in the tariff setting methodology within Section 14.14.5 and the Ex-Post Reconciliation within Section 14.17.37 of the CUSC to align with the updated definitions introduced by CMP368.

The Panel unanimously approved that the Terms of Reference have been met and agreed for CMP368/369 to proceed to Code Administrator Consultation. The Code Administrator Consultation will be issued on 10 August 2021 and will close 5pm on 1 September 2021.
