

CUSC Modifications Panel Meeting

Headline Report

Meeting Name:	Special CUSC Modifications Panel Meeting
Meeting No:	195
Date of Meeting:	18 October 2016
Venue:	National Grid House, Warwick

Any Questions?

Contact:
Heena Chauhan
 CUSC Panel Secretary

1 Introduction

Welcome to the CUSC Panel Headline Report. This shall be produced after every CUSC Panel meeting and aims to provide all of our key stakeholders / interested parties with an overview of the headlines and key decisions the Panel are currently managing. Full minutes of the meeting will be produced and approved at the next meeting of the CUSC Panel and will then be published on the website.

All presentations given at this Modifications Panel meeting can be found in the Modifications Panel area on the National Grid website¹

We would welcome any comments you may have.

2 Workgroup Reports

There were two Workgroup Reports presented to the CUSC Panel at this meeting.

CMP267 'Defer the recovery of BSUoS costs, after they have exceeded £30m, arising from any Income Adjusting Events raised in a given charging year, over the subsequent two charging years.'

CMP267 aims to defer any unforeseen increases in BSUoS cost arising from an Income Adjusting Event (IAE) by two years when those unforeseen costs exceeds £30m in a charging year.

The Panel reviewed the Workgroup Report and agreed that it should proceed to Code Administration Consultation working towards the proposed timetable.

CMP268 'Recognition of sharing by Conventional Carbon plant of Not-Shared Year-Round circuits'

CMP268 aims to change the charging methodology to more appropriately recognise that the different types of "Conventional" generation do cause different transmission network investment costs, which should be reflected in the TNUoS charges that the different types of "Conventional" generation pays.

¹ <http://www2.nationalgrid.com/UK/Industry-information/Electricity-codes/CUSC/Panel-information/Panel-meeting-dates-and-documents-2016/>

The change to the charging methodology would take the form that for generators which are classed as Conventional Carbon, the generator's ALF should be applied to both its Not-Shared Year-Round as well as its Shared Year-Round tariff elements.

The Panel reviewed the Workgroup Report and agreed that it should proceed to Code Administration Consultation working towards the proposed timetable.

3 Next Meeting

The next Special Panel meeting will take place on 25 October 2016 via teleconference to discuss CMP261, CMP264, CMP265, CMP269 and CMP270 and the next CUSC Panel meeting will take place 28 October 2016 at National Grid House, Warwick.
