

STC Panel Headline Report – 23 February 2022

Meeting name System Operator Transmission Owner Code Panel

The STC Panel Headline Report will be produced after every STC Panel and aims to provide an overview of the key decisions made. Minutes and an action log for this meeting will be published separately.

Approval of January 2022 Minutes

Panel Members approved the minutes from the January 2022 Panel meeting which can be found on the National Grid ESO website via the following [link](#).

New STC/STCP Modifications

No new STC/STCP modifications were formally submitted to the February Panel.

Draft Modifications

Two new draft modifications had been submitted to the February Panel - CM078 and PM0120 “Connection Triggering Distribution Impact Assessment”

CM078: STC change for CUSC Modification 'CMP328 - Connection Triggering Distribution Impact Assessment'

The Panel noted the proposed timeline for CM078 “*STC change for CUSC Modification 'Connection Triggering Distribution Impact Assessment'*” which can be found on the National Grid ESO website via the following [link](#).

This modification seeks to make changes to the STC to reflect CUSC modification CMP328 relating to Transmission connections that trigger an impact assessment on the Distribution network.

PM0120 - Connection Triggering Distribution Impact Assessment

This modification seeks to make changes to the STC Code Procedures to reflect CUSC modification CMP328 relating to Transmission connections that trigger an impact assessment on the Distribution network.

PeakGen TO Licence

To enable MRPL to accede to the STC, a Party Entry Process document has been created, which was circulated to the Panel and to MRPL in advance of the meeting. The Panel unanimously agreed to sign off the MRPL Party Entry Process document.

Code Administrators' Modifications Tracker

The Chair shared an update on the new Modification tracker with Panel members. Key improvements on the tracker include cross code impacts have been added, hyperlinks to the mod pages, code documents have been added as well as a link to the Ofgem decision timetable.

The new tracker has been published and can be viewed on ESO website through the usual links.

AOB

CM080 Nominations for Workgroup

The Chair shared an update that the ESO had not received enough workgroup nominations for a workgroup to be formed. STC governance rules requires 3 persons to form a workgroup (1 ESO representative, 1 TO representative and 1 OFTO representative). It was proposed by the Code Administrator that the Panel reconsider their decision for CM080 to proceed to a Workgroup and instead for this to be taken offline, and the updated Proposal to be represented – seeking a straight to Code Administrator Consultation governance route.

Date of the next meeting

The next STC Panel meeting will be held on **Wednesday 30 March 2022**.

Questions or feedback?

Panel Chair: Sally Musaka, Code Administrator

Panel Secretary: Rashpal Gata-Aura, Code Administrator
