

Maintenance Standards (CC.7.7) Working Group

November 2011 GCRP
pp11_63

Maintenance Standards (CC.7.7) Working Group (MSWG)

- Working Group established to:
 - review Grid Code obligation CC.7.7
 - assess the current industry codes processes and obligations associated with the notification of system fault level changes
 - consider cost recovery for a User with forced replacement of existing rated plant and apparatus

Maintenance Standards (CC.7.7) Working Group (MSWG)

- MSWG has held two meetings and have concluded:
 - agreement of changes to Grid Code obligation CC.7.7 to remove the Regional Differences
 - following a review of the different routes that system fault levels are notified, that no Grid Code changes are required
 - that STCP16.1 & 18.1 are reviewed by the STC Committee to determine if the current processes are robust and, if not, amend as appropriate through the STC governance process
 - following clarification of cost recovery obligations in CUSC 6.10.3, that no changes to Grid Code are required and that further issues from the industry regarding cost recovery should be pursued through CUSC governance.

Maintenance Standards (CC.7.7) Working Group – Way Forward

- Although conclusions have been reached a Working Group Report is still to be completed and agreed
- Terms of Reference for this Group states it should deliver its findings to the **November 2011** GCRP meeting
- **AGREE** - MSWG requests that this is extended to **January 2012**
