3.	The Review Group agreed to review the proposed GSR002 consultation document prior to its industry consultation for comment.

<b>4.</b>	<b>Review Register</b>
5.	The Review Group noted that the Grid Code P2/5 Working Group had identified two new review areas as outlined as follows: <ul style="list-style-type: none"><li>▪ Review of the GB SQSS and P2/6 to investigate whether there would be any merit in bringing the two standards closer together, perhaps going as far as aligning them at the interface between Transmission and Distribution Systems.</li><li>▪ Specify a methodology for Average Conditions for winter demand data.</li></ul>
6.	The Review Group noted the possible review areas but noted that formal review request form would have to be completed prior to any analysis being considered.
7.	It was noted that SHETL would be submitting a review request form to analyse whether Chapter 2 (Design of Generation Connections) of the GB SQSS should be inclusive of economic incentives.
