TNUoS Tariff Forecast Timetable for 2024/25 Tariffs

Dear Industry Colleagues,

This letter concerns the timetable for our forecasts of 2024/25 electricity Transmission Network Use of System (TNUoS) tariffs over the coming year. We have reviewed when the quarterly forecasts are currently published, based on customer feedback and the dates on which we receive key data that can have a material impact on tariffs.

We have finalised the timetable for 2024/25 tariff forecasts publications as below.

By 30 th April 2023	Five Year view of 2024/25 to 2028/29 TNUoS tariffs
	(including the initial forecast of 2024/25 TNUoS tariffs)
By 31st July 2023	Updated forecast of 2024/25 TNUoS tariffs
By 30 th November 2023	Draft 2024/25 TNUoS tariffs
By 31st January 2024	Final 2024/25 TNUoS tariffs

These dates may vary if unforeseen circumstances require it, but we will still aim to provide at least three forecasts before the Final tariffs are published in January 2024.

The judgement of the Court of Appeal in the appeals brought by Ofgem and SSE in relation to the Ofgem's CMP317/327 decision was published on 8th November¹. We are working with Ofgem to understand the next steps, if there is any impact to this forecast timetable we will communicate with industry as soon as practicable. All forecasts will be published on the TNUoS tariffs forecast section of our website: www.nationalgrideso.com/tnuos

We will continue to engage with you on the analysis that we can provide in our forecasts, in addition to any changes to this timetable (if any are required), via the Transmission Charging Methodology Forum (TCMF)².

If you have any queries, please contact us at <u>TNUoS.Queries@nationalgrideso.com</u>.

Yours faithfully

Nick Everitt
