

# **STCP Amendment Proposal Form**

**STCPAP004**

## **1. Title of Amendment Proposal**

STCP 04-1 – Incorporation of Outstanding Change Requests

## **2. Description of the Proposed Amendment (mandatory field)**

Incorporation of the following Change Requests that were outstanding at BETTA Go-Live:

C210.

This Change Request is attached at Attachment 1 to this STCP Amendment Proposal Form.

Minor changes to the Headers and Footers within the document are also proposed. These changes serve to ensure that the name of the STCP and its Issue Number and date are clearly visible on all pages. The phrase “UNCONTROLLED WHEN PRINTED” has also been added to the Footer in each page.

The following text has also been inserted before each of the Flow Diagrams within the STCPs clarifying that the text of the STCP has precedence in the event there is any disparity between the text and the flow diagrams:

“Note that the Process Diagrams shown in this Appendix [B] are for information only. In the event of any contradiction between the process represented in this Appendix and the process described elsewhere in this STCP, then the text elsewhere in this STCP shall prevail.”

This statement was included in some but not all STCPs during drafting and its inclusion here allows a consistent approach to be taken across all STCPs.

All of the above changes are reflected within the change-marked STCP attached as Attachment 2 to this STCP Amendment Proposal Form.

## **3. Description of Issue or Defect that Proposed Amendment seeks to Address (mandatory field)**

Prior to Go-Live a number of changes to “signed off” STCPs were identified by the User Groups. The incorporation of these Change Requests before Go-Live was not however deemed by the same User Groups as critical for Go-Live and it was agreed between the Parties that such Change Requests should be considered and where appropriate incorporated within the STCP following Go-Live. This STCP Amendment Proposal therefore summarises the outstanding Change Requests for this STCP and outlines draft legal text that would give effect to those outstanding Change Requests.

## **4. Impact on the STC (information should be given where possible)**

Effects on STCP 04-1 Real Time Data Change Management Issue 001 are as detailed in the Change Marked version attached at Attachment 2 to this STCP Amendment Proposal.

## **5. Impact on other frameworks e.g. CUSC, BSC (information should be given where possible)**

NONE

## **6. Impact on Core Industry Documentation (information should be given where possible)**

NONE

<p><b>7. <u>Impact on Computer Systems and Processes used by STC Parties</u> (information should be given where possible)</b></p> <p>NONE</p>
<p><b>8. <u>Details of any Related Modifications to Other Industry Codes</u> (where known)</b></p> <p>NONE</p>
<p><b>9. <u>Justification for Proposed Amendment with Reference to Applicable STC Objectives</u> (mandatory field)</b></p> <p>Although these changes were not deemed as critical for Go-Live it is the view of the proposer that should these Change Requests now be incorporated within STCP 04-1 this would better facilitate the following Applicable STC Objectives:</p> <ul style="list-style-type: none"> <li>the development, maintenance and operation of an efficient, economical and co-ordinated system of electricity transmission</li> <li>protection of the security and quality of supply and safe operation of the GB Transmission System insofar as it relates to the interactions between transmission licensees</li> <li>promotion of good industry practice and efficiency in the implementation and administration of the arrangements described in the STC.</li> </ul>

<p><b>Details of Proposer</b> Organisation's Name</p>	National Grid Company plc
<p>Capacity in which the Amendment is being proposed (i.e. STC Party or other Party as designated by the Authority pursuant to STC section B7.2.2.1 (b))</p>	STC Party
<p><b>Details of Proposer's Representative</b> Name Organisation Telephone Number Email Address</p>	<p>Mark Duffield National Grid Company plc 01926 654971 <a href="mailto:mark.duffield@ngtuk.com">mark.duffield@ngtuk.com</a></p>
<p><b>Details of Representative's Alternate</b> Name Organisation Telephone Number Email Address</p>	<p>Lilian Macleod National Grid Company plc 01926 656368 <a href="mailto:lilian.macleod@ngtuk.com">lilian.macleod@ngtuk.com</a></p>
<p><b>Attachments (Yes/No): Yes</b> If yes, title and number of pages of each attachment: Attachment 1 (xx Pages): Original Change Requests Attachment 2 (xx Pages): Revised legal text for STCP 02-1: Alarm and Event Management</p>	

**Notes:**

- Those wishing to propose an Amendment to the STC should do so by filling in this "Amendment Proposal Form" that is based on the provisions contained in Section 7.2 of the STC.
- The Committee Secretary will check that the form has been completed, in accordance with the requirements of the STC, prior to submitting it to the Committee. If the Committee Secretary accepts the Amendment Proposal form as complete, then she/he will write back to the Proposer informing them of the reference number for the Amendment Proposal and the date on which the Committee will consider the Proposal. If, in the opinion of the Committee Secretary, the form fails to provide the information required in the STC, then he/she may reject the Proposal. The Committee Secretary will inform the Proposer of the rejection and report the matter to the Committee at their

next meeting. The Committee can reverse the Committee Secretary's decision and if this happens the Committee Secretary will inform the Proposer.

The completed form should be returned to:

Lilian Macleod  
STC Committee Secretary  
Commercial Frameworks  
National Grid Company plc  
NGT House  
Warwick Technology Park  
Gallows Hill  
Warwick, CV34 6DA

Or via e-mail to: [STCTeam@uk.ngrid.com](mailto:STCTeam@uk.ngrid.com)

#### Outstanding issues to be resolved prior to company sign-off

Questions for DG1/UG:

1. Is Interface Equipment, as defined in STCP 18-5, a suitable definition for Data Transmission Equipment? This is a common term used across many STCPs.

# 1 Introduction

## 1.1 Scope

3.1.41.1.1 It is essential that all changes to real time data that involve modification to SCADA databases or displays are reported to, and co-ordinated with, affected Party(s). Affected Parties must be notified of changes in sufficient time to permit sufficient discussions to manage change effectively.

3.1.41.1.2 This document applies to NGC and the TO for real time data changes brought about by events such as:

- new Plant and/or Apparatus connected to the GB Transmission System;
- Plant and/or Apparatus reconnected to the GB Transmission System;
- Plant and/or Apparatus disconnected from the GB Transmission System;
- changes to Protection Apparatus or control equipment;
- changes to numbering or nomenclature of existing Plant and/or Apparatus;
- temporary changes made to the GB Transmission System;
- emergency changes to the GB Transmission System;
- User's System changes; and
- any other changes

that require modification to the NGC and TO SCADA database displays.

3.1.4

3.1.41.1.3 This procedure applies to NGC and each TO.

3.1.41.1.4 For the purposes of this document, TOs are:

- SPT; and
- SHETL.

3.1.41.1.5 At NGC sites that connect with SPT sites, certain real time data is provided to SPT via local Data Transmission equipment that is owned and maintained by SPT. Any changes that may affect this data are subject to the provisions of this document.

3.1.41.1.6 TO - TO data change management is outside the scope of this document. It is anticipated that a similar procedure shall be followed.

3.1.41.1.7 The procedure for the management of the Datalink is detailed in STCP 4-2 (Real Time Datalink Management) and is outside the scope of this document.

## 1.2 Objectives

3.1.41.2.1 This document specifies the requirements and responsibilities placed on NGC and TOs for ensuring that changes to real time data and displays are captured and made available to the other affected Parties in good time.

## 1.3 General Provisions

3.1.41.3.1 The change management process for SCADA data shall apply during the Commissioning and De-commissioning process (see STCP 19-4) and shall also apply to changes to equipment outside the scope of the Commissioning and De-commissioning process.

3.1.41.3.2 The TOs and NGC shall each nominate a contact point for data co-ordination, including a dedicated email account, to facilitate data co-ordination between NGC and TOs.

3.1.41.3.3 Communication of TO SCADA database changes shall be through a pro-forma providing a description of the change and a real time data spreadsheet detailing the actual changes to the data points. The format and content of the pro-forma as agreed from time to time is in Appendix C. Similarly, the format and content of the real time data spreadsheet as agreed from time to time is in Appendix D.

3.1.41.3.4 Parties will acknowledge receipt of data via the agreed contact points.

3.1.4

## 2 Key Definitions and Interpretation

### 2.1 *The following definitions apply for the purposes of this document:*

3.1.42.1.1 **Data Transmission Equipment** means equipment that collects indications and data from an NGC site and relays it the relevant TO through a communications route.

3.1.4

## 3 Procedure

### 3.1 *Changes not associated with Plant and/or Apparatus*

3.1.43.1.1 Following changes to SCADA real time data that are not associated with Plant and/or Apparatus, such as modifications to an outstation or a database legend change, the TO shall prepare a pro-forma (Appendix C) identifying the change and provide a supporting real time data spreadsheet (Appendix D) listing the changes made to the SCADA database including the relevant point number, record number, attributes and date of change. Where relevant an operational or display diagram shall also be included.

3.1.43.1.2 The information detailed in 3.1.1 shall be sent by the nominated TO contact point to the nominated NGC contact point as soon as reasonably practicable, which shall normally be not less than 4 weeks in advance of the implementation date. NGC shall provide acknowledgement of receipt of the relevant information to the TO via the agreed contact point. NGC shall ensure that its database is updated in line with the supplied information.

3.1.43.1.3 Where NGC requires changes to real time data at NGC sites where the TO has Data Transmission Equipment installed NGC shall identify the changes and provide the information to the TO using the pro forma Appendix C via the respective contact point, to enable changes to be made to the TO SCADA database. Where relevant an operational or display diagram shall also be included.

3.1.4 NGC shall notify the relevant TO(s) of any User initiated changes of which NGC has been made aware and which may require modification to that TO database or displays. Notification shall take place as soon as reasonably practicable which shall normally be not less than 4 weeks in order to allow sufficient time for the TO to satisfy its obligations under 3.1.1 and 3.1.2. NGC shall co-ordinate the change process between all parties.

3.1.43.1.5 Appropriate and timely testing shall be completed using agreed points of contact, at the request of either party, to validate the transmission of real time data from the TO to NGC following changes made to either or both the TO and NGC database.

### 3.2 *Commissioning / De-Commissioning*

3.1.43.2.1 STCP 19-4 Commissioning / De-Commissioning specifies the process for initiating and completing changes to the GB Transmission System. Changes to real time data are an essential part of that process.

3.1.43.2.2 The key dates in the Plant and/or Apparatus change process are:

- the planned date on which equipment becomes subject to or is removed from the TO safety rules
- the planned date of commissioning or de-commissioning of equipment

3.1.43.2.3 The TO and NGC shall plan the change process to allow sufficient time for all parties to evaluate and co-ordinate the changes. This shall normally be not less than 6 weeks prior to the planned database change implementation date that aligns with the key dates in 3.2.2

3.1.43.2.4 The TO shall supply the relevant real time data (specified in STCP 4-3: Provision of Real Time Data) via the respective contact point. This shall be in the format specified in 3.1.1 showing the proposed / amended /deleted data, including point ID, record number and associated attributes and proposed date of change. Where applicable operational and or display diagrams shall be supplied.

3.1.43.2.5 NGC shall supply the TO, via the agreed contact point, details of any changes to the real time information (specified in STCP 4-3) for NGC sites that contain TO Data Transmission Equipment using Appendix C. Where applicable operational and or display diagrams shall be supplied.

3.1.43.2.6 Where major changes to the GB Transmission System are to take place in stages, the TO shall provide data relevant to each stage of the change along with the proposed implementation dates.

3.1.43.2.7 As soon as reasonably practicable, NGC shall notify the relevant TO(s) of any User initiated Commissioning / De-commissioning of which they have been made aware that may require amendment to the TO SCADA database and/or operational / display diagrams.

3.1.43.2.8 All real time data changes associated with Commissioning/ De-Commissioning on the TO Transmission System or User System shall be the subject of close liaison between NGC and the TO in order to ensure that changes are co-ordinated. All Parties shall agree the time and date of implementation.

3.1.43.2.9 The TO shall ensure transmission of real time data to the Datalink in accordance with STCP 4-2 (Real Time Datalink Management).

3.1.43.2.10 In order to validate the transmission of alarms and indications from the TO appropriate and timely testing shall be undertaken using agreed points of contact, at the request of either party, following changes made to either or both the TO and NGC database

### **3.3 Emergency Changes**

3.1.43.3.1 Emergency changes are those required at very short notice to accommodate modifications initiated by events such as:

- emergency re-configuration of the GB Transmission System
- urgent changes in control time scales.

3.1.43.3.2 When NGC or the TO is made aware of emergency changes in real time data that must be implemented in a shorter timescale than that specified as normal, the process detailed in 3.2 and 3.3 shall still be followed wherever reasonably practicable.

## **4 Dispute Resolution**

3.1.44.1.1 Dispute resolution procedure inline with STC XXXXXX

## Appendices

### **Appendix A: General Terms/Conditions**

#### **A1: Terminology/Abbreviations**

NGC	National Grid Company
TO	Transmission Owner
SPT	Scottish Power Transmission Ltd
3.1.4 SHETL	Scottish Hydro Electric Transmission Ltd
3.1.4 SCADA	Supervisory Control and Data Acquisition

#### **A2: Definitions**

##### **STC definitions used:**

- User
- GB Transmission System

##### **CUSC definitions used:**

- Plant
- Apparatus

##### **Grid Code Definitions Used**

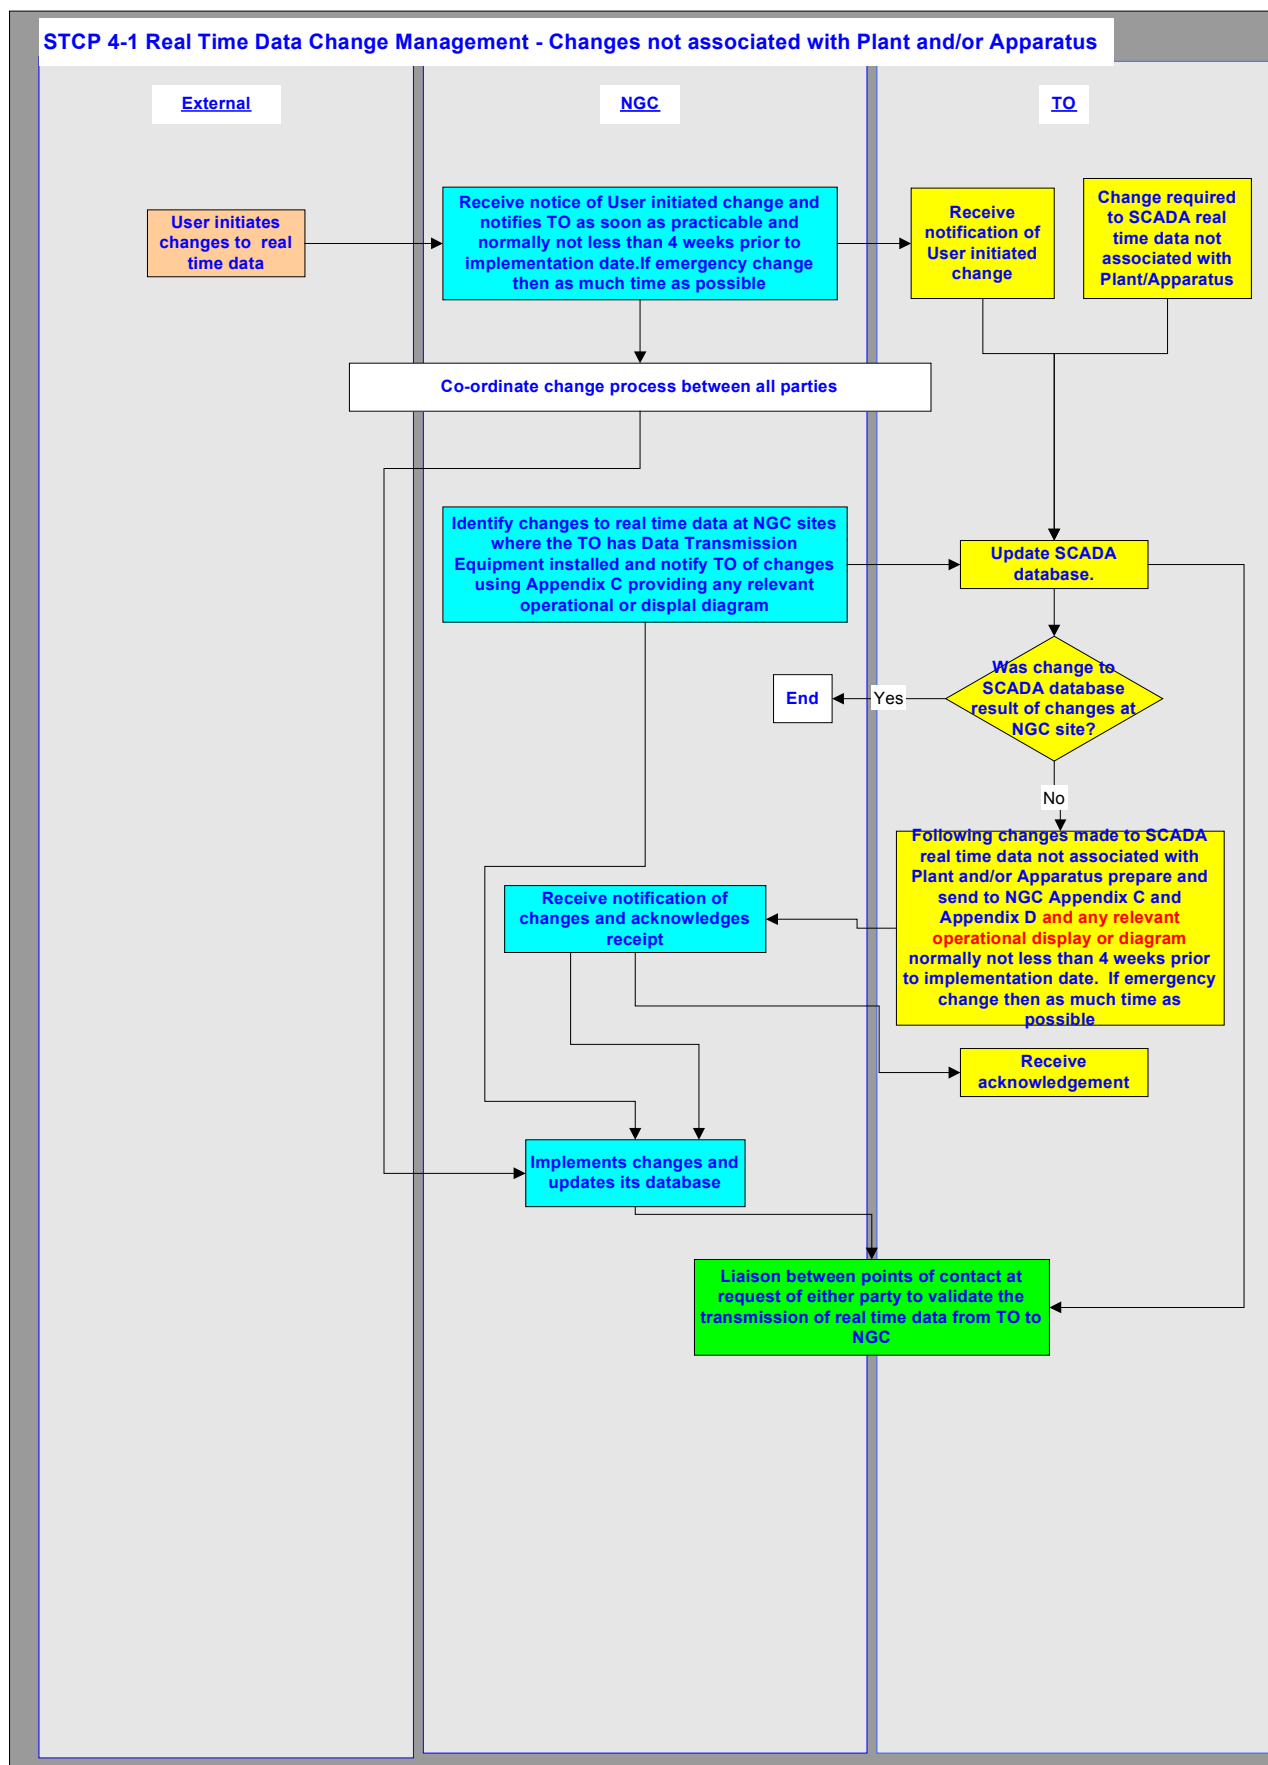

Protection Apparatus

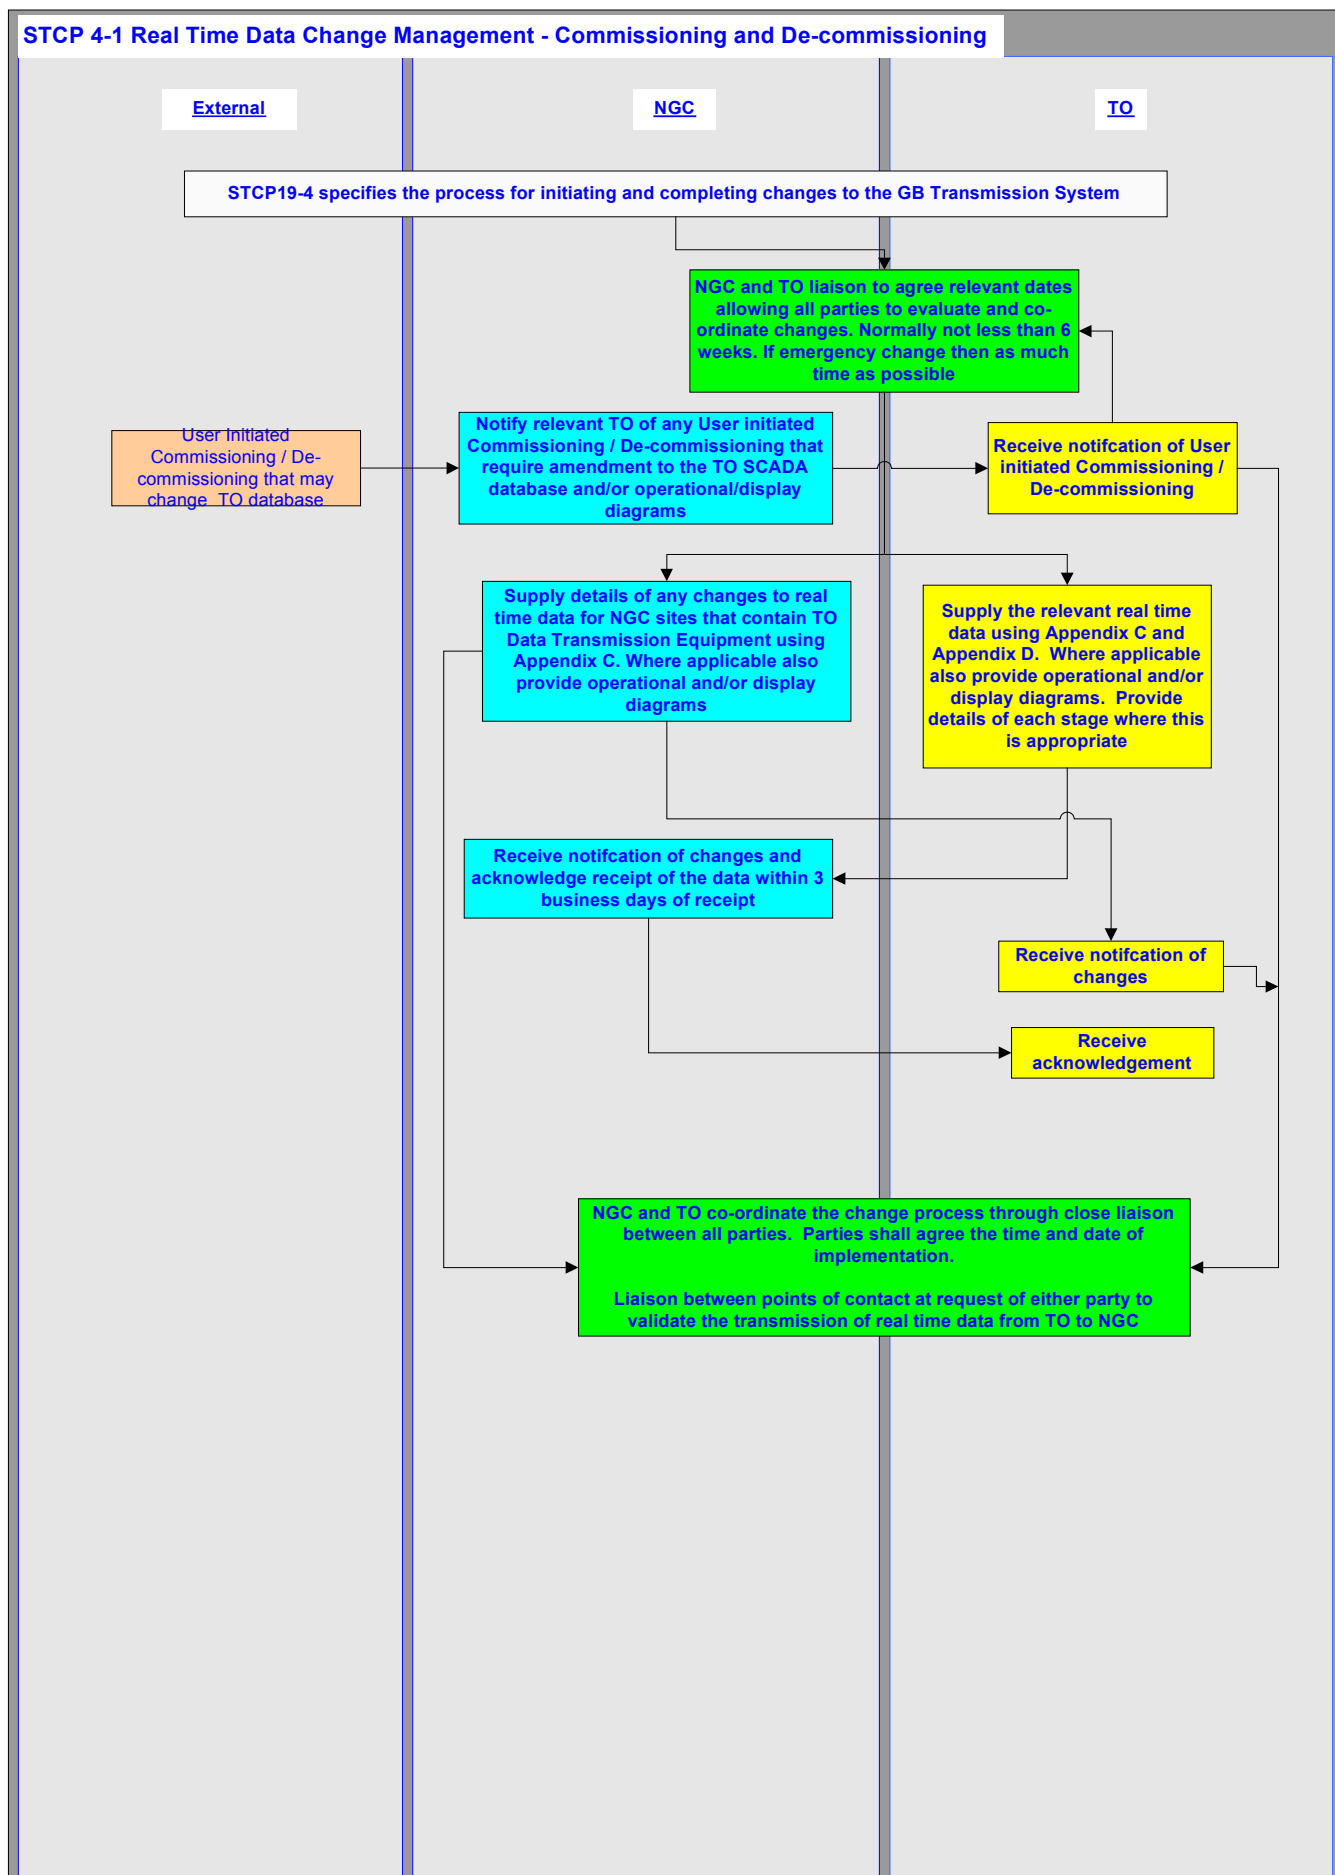

**Definitions used in the document that are covered in other STCPs**

**Datalink** is as defined in STCP 4-2.

## ***Appendix B: Flow Diagram***

Note that the Process Diagrams shown in this Appendix B are for information only. In the event of any contradiction between the process represented in this Appendix and the process described elsewhere in this STCP, then the text elsewhere in this STCP shall prevail.
