

Codes Summary

This document provides a summary as to latest developments concerning the various other Industry Codes:

CUSC

The **CUSC Amendments Panel** will meet on 15th December 2006. The main items for discussion will be:

- New Proposal – CAP143 (Interim Transmission Entry Capacity)
- Working Group Updates
 - CAP127 (Calculation and Securing of Value at Risk)
 - CAP131 (User Commitment for New and Existing Generators)
 - CAP140 (Change to BSC Part Obligations)
 - CAP141 (Clarification of the content of a Response to a Request for a Statement of Works)
 - CAP142 (Temporary TEC Exchange)

BSC

The **BSC Panel** will meet on 14th December 2006. The main items for discussion will be:

- Modification Report for P206 (Publication of BSC Panel Election Results)
- Modification Report for P208 (Housekeeping Modification)

Grid Code

The **Grid Code Review Panel** met on 23rd November 2006.

At the meeting it was agreed that the Power Park Modules and Synchronous Generating Units proposals would proceed to industry consultation and a Grid Code Working Group would be established Q1 2007 to discuss the proposed recommendations from the E3C Black Start Review.

The next meeting of the GCRP is scheduled to take place on Thursday, 15th February 2007.

Charging

The next meeting of the **Charging User Group** (ChUG) is due to be held at Bellshill on 9th January 2007.

Condition 6 (Charging Arrangements for Site Specific Maintenance) – Confirmation regarding the fulfilment of the condition was received from the Authority on 14th November 2006.

Condition 3 (The treatment of intermittent generation in the GB Charging Methodology) - Confirmation regarding the fulfilment of the condition was received from the Authority on 15th November 2006

Condition 2 (Incremental Cost of Capacity) and **Condition 4** (Long Term Fixed Access Products) – the Reports to the Authority were submitted on 16th October 2006 and await Ofgem's determination.

Ofgem are to undertake an Impact Assessment on the Charging for SQSS Design Variations. The associated consultation document is expected to be published on 15th December 2006.

TO Price Review

Ofgem's final proposals were published on 4th December 2006, and are available on the Ofgem website: - <http://www.ofgem.gov.uk>.

STC AMENDMENT REGISTER – AS AT 5th December 2006

All documents referred to in the Amendment Register are available on the National Grid STC website.

CA022		Amendments to Section H resulting from CA013			
Proposer	National Grid	Submitted	14/08/06	Submitted Priority	Normal
Amendment Description		Current status and progress			
<p>The Amendment Proposal proposes to add two additional sub-paragraphs to Section H (Dispute Resolution) of the STC that were inadvertently omitted during the development of CA013 (TEC Exchange Rate Request Process).</p> <p>CA013 added a new Part Three of Section D to the STC, including two paragraphs, 1.4 and 2.7 which described matters that would be potentially disputable in accordance with paragraph 4.1 of Section H. Section H is structured so that all such disputable matters are listed in paragraphs 4.3 and 4.4. The new paragraphs introduced by CA013 should have therefore been listed in paragraph 4.4 of Section H but this change was inadvertently omitted.</p> <p>CA022 proposes to correct this by adding two additional sub-paragraphs, 4.4.14 and 4.4.15, to Section H, which will refer to paragraphs 1.4 and 2.7 of Section D, Part Three, respectively. It will also make it clear that disputes in reference to TEC Exchange fall under the provisions of paragraph 4.4 and not 4.3.</p>		<p>CA022 (Amendments to Section H resulting from CA013) was proposed by National Grid and discussed at the August STC Committee meeting. The Committee decided that CA022 should proceed directly to the Assessment and Report Phase.</p> <p>The Committee reviewed and signed-off the Proposed Amendment Report at September's STC Committee meeting. Proposed Amendment Report circulated to the industry for consultation on 22nd September 2006. Consultation period closes on 6th October 2006.</p> <p>No consultation responses received. Final Amendment Report submitted to Authority on 12th October 2006.</p> <p>Authority approved CA022 on 13th November 2006. CA022 was implemented on 20th November 2006.</p>			

STC AMENDMENT REGISTER – AS AT 5th December 2006

CA021

Exchange of Investment Planning Data

Proposer	National Grid	Submitted	11/04/06	Submitted Priority	Normal
-----------------	---------------	------------------	----------	-------------------------------	--------

Amendment Description

This amendment proposes changes to paragraph 2.4.3 (and 2.4.2) of Schedule 3 of the STC to allow Parties to disclose specific data to Transmission Owners on an enduring basis for the purposes of transmission investment planning, specifically stability studies.

The current provisions of paragraph 2.4.3 of Schedule 3 will expire on 30 September 2006. However, in the view of the proposer, there is a continuing need for this data to be provided to enable all Parties to meet their Licence obligations. It is therefore proposed that this data exchange is made permanent, but that the relevant sections of Schedule 3 are made more specific about the data that can be disclosed.

Current status and progress

CA021 Exchange of Certain Investment Planning Data was proposed by National Grid and was discussed at the 18th April 2006 STC Committee meeting. The Committee decided to take forward CA021 to the Evaluation Phase, meeting was held on 8th May 2006 to discuss further. The Committee AGREED at the 17th May 2006 meeting that the Evaluation phase was complete for CA021 and a Proposed Amendment Report should be drafted.

The Committee reviewed and signed-off the Proposed Amendment Report for Industry Consultation. Sent out for Industry consultation on 27/06/2006. Close of consultation on 11th July 2006.

No consultation responses received. Final Amendment Report submitted to Authority on 14th July 2006.

Authority approved CA021 on 8th August 2006. CA021 was implemented on 15th August 2006.

STC AMENDMENT REGISTER – AS AT 5th December 2006

CA020

GB Transmission System Performance Reporting

Proposer	SPTL	Submitted	14/03/06	Submitted Priority	Normal
-----------------	------	------------------	----------	-------------------------------	--------

Amendment Description

This Amendment Proposal seeks to establish a process in the STC for the development of a statement by which the GB Transmission System performance can be measured and for the production of the associated report. The production of the statement and the report are licence requirements on National Grid. It is a licence requirement on the TOs that they provide assistance to National Grid in the production of the report.

The proposed amendment is based upon existing STC processes by which the Transmission Licensees co-operate to produce the Seven Year Statement.

Current status and progress

CA020 GB Transmission Performance Reporting was proposed by SPTL and discussed at the March 2006 STC Committee meeting. The STC Committee decided for CA020 to go forward to the Evaluation phase.

A teleconference took place on 11th April 2006 to discuss the legal text. At the 18th April 2006 STC Committee meeting the Committee AGREED for CA020 to move to Assessment and Report Phase.

Consultation closed on 6th June 2006, no responses received. Final Amendment Report submitted to Ofgem for determination on 20/6/2006.

Authority approved CA020 on 24th July 2006. CA020 was implemented on 31st July 2006.

CA019

Assessment of the Impact of Certain Embedded Power Stations

Proposer	SPTL	Submitted	20/02/06	Submitted Priority	Normal
-----------------	------	------------------	----------	-------------------------------	--------

Amendment Description

This Amendment Proposal seeks to establish a process in the STC for the assessment of the impact on the GB Transmission System of certain Embedded Power Stations in the licensed area, or within the boundary of influence, of a Transmission Owner.

This Amendment Proposal reflects the Working Group Alternative Amendment 1 to CUSC Amendment Proposal CAP097, which seeks to clarify National Grid's requirements of Small and Medium Embedded Power Stations as GBSO. SPTL is also proposing an Alternative Amendment to CA019, which would facilitate the revised process proposed by the CAP097 Consultation Alternative Amendment 1 proposed by CE Electric UK.

Current status and progress

CA019 was discussed at the February Committee meeting. CA019 and Alternative have been proposed by SPTL as alternatives to CA017 and Alternative. This is linked to CA016 and CA017, and follows discussions at the CA016/17 working group held on 09/01/06, 01/02/06 and 15/02/06. At the March Committee meeting it was decided a Teleconference will be held to signoff the Proposed Amendment Report.

A teleconference took place on 3rd April 2006. Committee decided to send out for Industry Consultation – Industry Consultation closed on 20th April 06. One Response was received. At the STC Committee meeting on 27th April 2006 the Committee AGREED to submit to the Authority. Amendment Report Submitted to Authority on 27th April 2006.

The Authority rejected CA019 on 14th June 2006 (In line with STC recommendation)

STC AMENDMENT REGISTER – AS AT 5th December 2006

CA018

Removal of the Restriction on Proposing Alternative Amendments

Proposer	National Grid	Submitted	14/02/06	Submitted Priority	Normal
-----------------	---------------	------------------	----------	-------------------------------	--------

Amendment Description

This Amendment Proposal seeks to remove from the STC the restriction that each Party may only propose one Alternative Amendment. Paragraph 7.2.2.8 of Section B of the STC currently limits Parties to proposing only one Alternative Amendment. This has proved to be overly restrictive, particularly when developing STC amendments to “back-off” CUSC amendment proposals, which may contain a greater number of Alternatives.

Current status and progress

CA018 Removal of the Restriction on Proposing Alternative Amendments was discussed at the February Committee. The Committee decided that CA018 could proceed to the Assessment & Report Phase. At the March Committee meeting the Committee decided the Proposed Amendment Report to be sent for consultation for 10 business days.

Consultation closed on 6th April 2006. No industry responses received. At the STC Committee meeting on 18th April 2006 the Committee decided to submit to the Authority for determination. Amendment Report Submitted to Authority on 19th April 2006. Authority approved CA018 on 31st May 2006. Implementation date is 7th June 2006.

CA017

Assessment of the Impact of Certain Embedded Power Stations

Proposer	National Grid	Submitted	13/12/05	Submitted Priority	Normal
-----------------	---------------	------------------	----------	-------------------------------	--------

Amendment Description

This Amendment Proposal seeks to establish a process in the STC for the assessment of the impact on the GB Transmission System of certain Embedded Power Stations in the licensed area, or within the boundary of influence, of a Transmission Owner.

This Amendment Proposal reflects the Working Group Alternative Amendment 1 to CUSC Amendment Proposal CAP097, which seeks to clarify National Grid's requirements of Small and Medium Embedded Power Stations as GBSO. National Grid is also proposing an Alternative Amendment to CA017, which would facilitate the revised process proposed by the CAP097 Consultation Alternative Amendment 1 proposed by CE Electric UK.

Current status and progress

CA019 was discussed at the February Committee meeting. CA019 and Alternative have been proposed by SPTL as alternatives to CA017 and Alternative. This is linked to CA016 and CA017, and follows discussions at the CA016/17 working group held on 09/01/06, 01/02/06 and 15/02/06. At the March Committee meeting it was decided a Teleconference will be held to signoff the Proposed Amendment Report.

A teleconference took place on 3rd April 2006. Committee decided to send out for Industry Consultation – Industry Consultation closed on 20th April 06. One Response was received. At the STC Committee meeting on 27th April 2006 the Committee AGREED to submit to the Authority. Amendment Report Submitted to Authority on 27th April 2006.

The Authority rejected CA017 on 14th June 2006 (In line with STC recommendation).

STC AMENDMENT REGISTER – AS AT 5th December 2006

CA016		Modification Applications in Respect of Certain Embedded Power Stations			
Proposer	National Grid	Submitted	13/12/05	Submitted Priority	Normal
Amendment Description		Current status and progress			
<p>This Amendment Proposal seeks to establish a process in the STC for the assessment of the impact on the GB Transmission System of certain Embedded Power Stations in the licensed area, or within the boundary of influence, of a Transmission Owner.</p> <p>This Amendment Proposal reflects the original CUSC Amendment Proposal CAP097 (as proposed by National Grid), which seeks to clarify National Grid's requirements of Small and Medium Embedded Power Stations as GBSO. National Grid is also proposing an Alternative Amendment to CA016, which would facilitate the revised process proposed by both the CAP097 Working Group Alternative Amendment 2 and the CAP097 Consultation Alternative Amendment 3 proposed by SP Transmission & Distribution.</p>		<p>CA019 was discussed at the February Committee meeting. CA019 and Alternative have been proposed by SPTL as alternatives to CA017 and Alternative. This is linked to CA016 and CA017, and follows discussions at the CA016/17 working group held on 09/01/06, 01/02/06 and 15/02/06. At the March Committee meeting it was decided a Teleconference will be held to signoff the Proposed Amendment Report.</p> <p>A teleconference took place on 3rd April 2006. Committee decided to send out for Industry Consultation – Industry Consultation closed on 20th April 06. One Response was received. At the STC Committee meeting on 27th April 2006 the Committee AGREED to submit to the Authority. Amendment Report Submitted to Authority on 27th April 2006.</p> <p>Ofgem have approved CA016 Alternative Amendment on 14th June 2006. Implementation date of 14th July 2006.</p>			

All documents referred to in the Amendment Register are available on the National Grid CUSC website.

CAP142

Clarification of the content of a Response to a Request for a Statement of Works

Proposer National Grid

Submitted 24/11/06

**Submitted
Priority** Normal

Amendment Description

The current arrangements codified in CUSC 6.30.3 only appear to allow TEC trades between parties from the following 1 April on an enduring basis. This amendment seeks to introduce a much more flexible approach to TEC exchange such that these can be done between parties within year for variable periods of time as defined in a bilateral agreement. NGET would have a role in identifying the exchange rate applicable between parties as in the current arrangements.

It is envisaged that the party temporarily transferring TEC would continue to pay the TNUOS charges and this may be recovered from the receiving party as part of the bilateral agreement.

Current status and progress

- CAP142 was presented to the November 2006 Panel meeting. The Panel decided that CAP142 should proceed to working group for 3 months. The date of the first meeting of the Working Group to be confirmed.

CAP141

Clarification of the content of a Response to a Request for a Statement of Works

Proposer National Grid

Submitted 24/11/06

**Submitted
Priority** Normal

Amendment Description

It is proposed that the CUSC be modified to clarify the content of a response to a Request for a Statement of Works pursuant to CUSC section 6.5.5.

Current status and progress

- CAP141 was presented to the November 2006 Panel meeting. The Panel decided that CAP141 should proceed to working group for 3 months. The first meeting of the Working Group is scheduled for 7 December 2006

CAP140

Proposer National Grid

Change to BSC Party Obligations

Submitted 24/11/06

**Submitted
Priority** Normal

Amendment Description

It is proposed that the CUSC be modified to remove an anomaly in Section 6.29. This currently allows a generator to avoid mandatory accession to the BSC provided another party is responsible under the BSC for its export and either:

- a) the generator is Exempt and directly connected (Section 6.29.2) or
 - b) the generator is Exemptable, Embedded and Large (Section 6.29.3).
- This drafting thus requires an Exempt or Exemptable User, acting as an Embedded Small Power Station or Embedded Medium Power Station, to accede to the BSC even if another party was to be responsible under the BSC for its export.

Current status and progress

- CAP140 was presented to the November 2006 Panel meeting. The Panel decided that CAP140 should proceed to working group for 3 months. The first meeting of the Working Group is scheduled for 14 December 2006

CAP132-139

Proposer National Grid

Housekeeping Amendments

Submitted 21/09/06

**Submitted
Priority** Normal

Amendment Description

Housekeeping Amendments

Current status and progress

- CAP132-139 was presented to the September 2006 Panel meeting. The Panel decided that CAP132-139 should follow the housekeeping process. The draft Amendment Report was circulated on 6 October 2006 with a closing date of 20 October 2006. The final Amendment Report was issued to the Authority on 25 October 2006. The Authority approved CAP132-139 on 9 November 2006 for implementation on 23 November 2006

CAP131

User Commitment for New and Existing Generators

Proposer National Grid

Submitted 21/09/06

**Submitted
Priority** Normal

Amendment Description

This Amendment Proposal adds a new section to the CUSC defining the principles of User Commitment. By "User Commitment", we mean;

1. defining the monies to be secured by generators for incremental TEC; and
2. defining the ongoing liabilities of existing generators to incentivise TEC reduction information.

Current status and progress

- CAP131 was presented to the September 2006 Panel meeting. The Panel decided that CAP131 should proceed to working group for 3 months. The first meeting of the Working Group was held on 19 October 2006. **The Working Group requested an extension of 2 months at the CUSC Panel Meeting on 24 November 2006 which the Authority approved. The report will now be given to the February 2007 CUSC Panel**

CAP130

CUSC Connection Application Form – Fixed and Variable Application Fees

Proposer National Grid

Submitted 21/09/06

**Submitted
Priority** Normal

Amendment Description

It is proposed to amend the CUSC Application Forms within Exhibits B (Connection Application), D (Use of System Application), I (Modification Application) and Q (BELLA Application) to provide information to applicants regarding their choice in application fee between fixed and variable fee and to include a tick box to request applicants to indicate their application fee choice.

Current status and progress

- CAP130 was presented to the September 2006 Panel meeting. The Panel decided that CAP130 should proceed to industry consultation. The Consultation Report was circulated on 6 October 2006 with a closing date of 3 November 2006. **The Panel voted that CAP130 better facilitated the applicable CUSC objectives of the CUSC on 24 November 2006. The Draft Amendment Report was circulated to the Panel on 28 November 2006 to ensure their vote was captured correctly, with a closing date of 5 December 2006 for any comments.**

Removal of CUSC 6.17 and section B from Exhibit F

CAP129

Proposer National Grid

Submitted 21/09/06

**Submitted
Priority** Normal

Amendment Description

It is proposed to remove CUSC 6.17 and Section B from Exhibit F of the CUSC for Use of System Applications (Suppliers or Interconnector Users), as the provisions are no longer required, consequently this causes confusion for new applicants.

Current status and progress

- CAP129 was presented to the September 2006 Panel meeting. The Panel decided that CAP129 should proceed to industry consultation. The Consultation Report was circulated on 6 October 2006 with a closing date of 3 November 2006. **The Panel voted that CAP129 better facilitated the applicable CUSC objectives of the CUSC on 24 November 2006. The Draft Amendment Report was circulated to the Panel on 28 November 2006 to ensure their vote was captured correctly, with a closing date of 5 December 2006 for any comments.**

CAP128

Proposer National Grid

Submitted 21/09/06

**Submitted
Priority** Normal

Amendment Description

It is proposed to remove Section 10 (Transitional Issues) of the CUSC. This relates to issues arising out of the transition from the MCUSA., this is no longer required as MCUSA was replaced in 2001.

Current status and progress

- CAP128 was presented to the September 2006 Panel meeting. The Panel decided that CAP128 should proceed to industry consultation. The Consultation Report was circulated on 6 October 2006 with a closing date of 3 November 2006. **A CAA was proposed by Centrica and a second period of consultation commenced on 8 November 2006, which concluded on 22 November 2006. A Draft Amendment Report is was circulated to the industry on 28 November 2006, with a closing date for comments of 5th December**

CAP127

Calculation and Securing of Value at Risk

Proposer National Grid

Submitted 21/09/06

**Submitted
Priority** Normal

Amendment Description

Section 3 - Credit Requirements (calculation of security for Demand TNUoS)

Value at Risk (VAR) is the maximum amount of Use of System liability that any User is required to secure ("Security Requirement").

It is the intention of this proposal to ensure that the CUSC more clearly reflects both the value and variability of the true value at risk throughout the year. Hence, National Grid propose an amendment to the CUSC that seeks to implement a calculation of VAR for Demand TNUoS charges that is more closely aligned to the monetary value at risk and actual risk of exposure to non payment, and to more appropriately define the way in which VAR has to be secured.

Current status and progress

- CAP127 was presented to the September 2006 Panel meeting. The Panel decided that CAP127 should proceed to working group for 3 months. The first meeting of the Working Group was held on 18 October 2006. **The final Working Group meeting was held on 22 November and the report will be submitted to the December 2006 CUSC Panel.**

CAP126 Clarification of the applicability and definition of Qualifying Guarantee and Independent Security**Proposer** National Grid**Submitted** 21/09/06**Submitted
Priority** Normal**Amendment Description**

Currently within CUSC Section 3, a '**Qualifying Guarantee**' and '**Independent Security Arrangement**' are open to misinterpretation. The proposal seeks to rectify this issue and better align the CUSC to the original intention of Ofgem's Best Practice Guidelines, as follows;

- To move **Qualifying Guarantees** from being Collateral (i.e. part of the Security Amount) to instead determining the **User's Allowed Credit**;
- To clarify that these **Qualifying Guarantees** can only be provided by a Parent Companies;
- To clarify that where Parent Companies provides **Qualifying Guarantees** for more than one User, the **Qualifying Guarantees** in aggregate cannot exceed the value of **User's Allowed Credit** that would be extended to the Parent Company if it were a User; and
- To clarify that **Independent Security** can only be provided by entities other than a Parent Company

Current status and progress

- CAP126 was presented to the September 2006 Panel meeting. The Panel decided that CAP125 should proceed to working group for 2 months. The first meeting of the Working Group was held on 18 October 2006. **The CUSC Panel agreed on 24 November 2006 that CAP126 should proceed to Consultation.**

CAP125**Revisions Resulting from Interconnector Separation****Proposer** National Grid**Submitted** 21/09/06**Submitted
Priority** Normal**Amendment Description**

The amendment proposes to remove certain provisions in the CUSC relating to the French Interconnector. Historically, this was part of National Grid Electricity Transmission plc ("NGET" or "The Company"), but on 14th August 2006 was transferred to a separate legal entity, National Grid Interconnectors Ltd ("NGIL"), as part of the process of interconnector licensing. It is now appropriate to amend the CUSC to reflect the consequential effects of this separation on the CUSC obligations relating to the roles of Interconnector Error Administrator and Interconnector Owner.

Current status and progress

- CAP125 was presented to the September 2006 Panel meeting. The Panel decided that CAP125 should proceed to industry consultation. The Consultation Report was circulated on 6 October 2006 with a closing date of 3 November 2006. **The Panel voted that CAP125 better facilitated the applicable CUSC objectives on 24 November 2006. The Draft Amendment Report was circulated to the Panel on 28 November 2006 to ensure their vote was captured correctly, with a closing date of 5 December 2006 for any comments.**

CAP124**Clarification of the withholding of payments for Operational Intertrips****Proposer** National Grid**Submitted** 11/05/06**Submitted
Priority** Normal**Amendment Description**

It is proposed to change section 4.2A.5 to include an additional provision expanding upon the current clauses to clarify that a Restricted Export Level Payment or Intertrip Payment will be withheld should the Intertrip operate when a User has failed to disarm the System to Generator Operational Intertripping Scheme in accordance with an instruction from National Grid.

Current status and progress

- CAP124 was presented to the May 2006 Panel meeting. The Panel decided that CAP124 should proceed to industry consultation. The consultation report was circulated on 23 May 2006 with a closing date of 20 June 2006. A CAA was proposed by E.ON and a second period of consultation commenced on 27 June, which concluded on 11 July 2006. The Panel voted that CAAB better facilitated the applicable objectives of the CUSC on 28 July 2006. The Draft Amendment Report was circulated to the Panel on 2nd August 2006 to ensure their vote was captured correctly, with a closing date of 9th August 2006 for any comments. The Amendment Report was issued to the Authority on 15th August 2006. The Authority approved CAAB on 6 September 2006 for implementation on 20 September 2006.

CAP107

Redefinition of Response Energy Payment (REP) for Mandatory Frequency Response

Proposer E.On

Submitted 08/12/05

Submitted
Priority Normal

Amendment Description

CAP107 seeks to make a change to the calculation of Response Energy Payment under section 4.1.3.9A of CUSC so what a generator pays, or is paid, is its First Bid Price, for changes in energy output which occur as a result of delivering frequency response.

Currently the Response Energy is priced at a reference price which is the average of the time weighted average System Buy Price and time weighted average System Sell Price for the preceding calendar month.

By paying, or charging the relevant BMU a price equivalent to its First Bid Price, the generator concerned is able to more closely reflect its actual costs.

Current status and progress

CAP107 was presented to the December Panel Meeting. The Panel determined that CAP107 should proceed to consideration by the BSSG acting as a Working Group for a period of 3 months, presenting their Final Working Group Report to the March Panel Meeting. The Authority agreed to a month extension at the CUSC Panel meeting 24 February 2006. The Working Group will now report to April Panel Meeting. At the CUSC Panel Meeting on the 31 March 2006 the Authority agreed to an extension due to the proposed cancellation of the April meeting. The Working Group reported to the May Panel Meeting, where it was decided to proceed to Industry Consultation. The Consultation Document was issued 23 May 2006 with a closing date of 20 June 2006 for comments. A Draft Amendment Report is to be circulated to the industry for 5 days prior to the July CUSC Panel. The Panel voted on 28/07/06 for WGAAB as being the best option with a 3 month implementation from the Authority decision. The Draft Amendment Report was circulated to the Panel on 4th August 2006 to ensure their vote was captured correctly, with a closing date of 11th August 2006 for any comments. The Amendment Report was issued to the Authority on 16th August 2006. The Authority approved WGAAB on 28 September 2006 for implementation on 28 December 2006.

Modification Register part 1 – Pending Modifications

Mod No.	Urgent	Title	Description	Date Raised	Proposer/ Organisation	Mod Group	Status
P198	—	Introduction of a Zonal Transmission Losses scheme	Under the current BSC arrangements all transmission system losses are allocated to BSC parties in proportion to metered energy, whether production or consumption on a uniform allocation basis (45% to production accounts, 55% to consumption accounts). Therefore, the cost of heating (variable) transmission losses is allocated amongst BSC Parties regardless of the extent to which they give rise to them. This means that customers in the north of GB and generators in the south of England have to pay some of the costs of transmitting electricity to locations miles away from the source of generation. The proposed scheme will enable the variable costs of transmission losses to be allocated on a cost-reflective basis and reflected on parties that cause them. The modification would remove the current cross subsidies and associated discrimination that is inherent in the uniform allocation of transmission losses.	16/12/05	Terry Ballard RWE NPOWER	P82 TLFMG	Sent to the Authority for decision on 22 September 2006. BSC Panels recommendation is that both the proposed and alternative modifications be rejected.
P200	—	Introduction of a Zonal Transmission Losses scheme with Transitional Scheme	Section T of the BSC contains the term “transmission loss factor” (TLF), currently set to zero. We propose that, subject to feasibility, from 1st October 2007, the value of TLF be amended from zero to a zonal factor to be derived ex-ante and applied separately to generation and demand by zone, as per P198. We propose that, concurrent to the introduction of zonal TLFs, a transitional scheme is applied to existing generating plant meaning CVA-registered BM Units, including interconnector units, with their production/consumption flag set to “production” (“Production BMUs”). The transitional scheme would allow time-limited retention of existing transmission loss factors for fixed volumes of energy according to a mechanism similar to the EU ETS.	21/04/06	Phil Lawless TEESIDE POWER	P198 MG	Sent to the Authority for decision on 22 September 2006. BSC Panels recommendation is that both the proposed and alternative modifications be rejected.
P203	—	Introduction of a seasonal Zonal Transmission Losses scheme	This modification is based on the seasonal alternative solution to P198 developed at the modification group but without any phasing. Seasonal zonal Transmission Loss Factors (TLF) (the “applicable TLFs”) would be derived ex ante for application to generation and demand BMUs within a zone (the “applicable zone”) for each of the four BSC seasons. The proposed scheme would retain the current process for allocating transmission losses to generation and demand (45% of transmission losses to production accounts and 55% to consumption accounts).	26/06/06	Terry Ballard RWE NPOWER	P198 MG	Sent to the Authority for decision on 22 September 2006. BSC Panels recommendation is that the proposed modifications be rejected.

Mod No.	Urgent	Title	Description	Date Raised	Proposer/ Organisation	Mod Group	Status
P204	—	Scaled Zonal Transmission Losses	Apportion an amount of estimated total variable (heating) losses in each period between BM Units in proportion to their flow volumes multiplied by a scaled zonal marginal Transmission Loss Factor determined from a load flow model. The remaining variable losses and fixed losses would be shared between all flows in proportion to volume as currently. The scaling factor would be determined such that on average over every zone and over time, no BM Unit should expect an allocation of losses less than its uniform volume proportion of fixed losses.	03/07/06	John Capener BRITISH ENERGY	P198 MG	Sent to the Authority for decision on 16 November 2006. BSC Panels recommendation is that the proposed modification be rejected.
P206	—	Publication of BSC Panel Election Results	Annex B-2 of the Code should be amended to require BSCCo to disclose the number of preference votes received in each voting round by candidates standing for election to the BSC Panel. Subject to approval, this amendment should be implemented from the submission date of this Modification Proposal, in order to disclose the 2006 election results. The details of preference votes cast by Trading Parties would remain secret. The option of Trading Parties to require that a BSC Auditor scrutinise the conduct of the election would remain unaffected.	03/08/06	Ben Sheehy E.ON UK PLC	GSMG	In the Report Phase Draft Modification Report to be Presented to the BSC Panel on 14 December 2006.
P207	—	Introduction of a new governance regime to allow a risk based Performance Assurance Framework (PAF) to be utilised and reinforce the effectiveness of the current PAF	This Modification proposes to introduce appropriate new governance arrangements to allow a risk based Performance Assurance Framework (PAF) to be utilised and to reinforce the effectiveness of the current PAF. It builds on the work undertaken in the recent PAF Review.	29/09/06	Carole Pitkeathley ENERGYWATCH	VASMG/ GSMG	In the Assessment Phase Interim Report to be presented on 14 December 2006. Assessment Report to be Presented to the BSC Panel on 11 January 2007.
P208	—	Housekeeping Modification	Minor changes to the Code to correct: manifest errors, incorrect references, redundant clauses, use of Code defined terms, typographical errors and minor inconsistencies.	09/11/06	BSC Panel	N/A	In the Report Phase Draft Modification Report to be Presented to the BSC Panel on 14 December 2006
