Subject: Impact of CA016 on the STCPs

Alec

Recently you mentioned to me that, now STC Amendment CA016 Alternative has been approved, we need to discuss the impact of this on the STC Procedures.

We've had a think about it here at National Grid, and believe that it would probably be best to create a new STCP18-4 Request for a Statement of Works.

CA016 introduces a new Part 4 of Section D of the STC to describe the process for assessing a Request for a Statement of Works, and, if Works are required, the application would then progress as a Modification Application through the existing Part 2 of Section D. Our thinking is to mirror this structure in the STCPs, with the new 18-4 specifying the Request for a Statement of Works process. Where Works are required, and the User wishes to proceed, the process would then be progressed through the existing STCP18-1.

The attached flow chart sets out our initial view as to what would be included in 18-4 and how it would work. Any views or comments on this from anyone copied in on this e-mail would be very welcome.

STCP18-4 Request
for a Stateme...

If there is broad agreement with the overall concept (and, if not, please let me know), I would anticipate writing a first draft of 18-4 and then organising a meeting to go through it in detail. I hope this seems like a sensible way forward.
