This session is part of the (good) work. We've never done good results out. Remember:

- Ask clarifying questions before we begin,
- good energy in acronyms or inside language.
- Speak up, think big, raise concerns, be patient, don't use

### Future Releases

1. APIs - General update and call for early adopters
2. Slow and Quick Reserve Services
3. APIs enhancements (Update Unit/ Asset)
4. Integration with the Enduring Auction Capability
5. Contract Management
6. Unit Versioning enhancements
7. Integration with the Data and Analytics Platform
8. FFR, ... ?
9. Expex spot Auction run/
10. Is the EAC auction go

As we work on these releases, we value your inputs so that your user experience is improved. Additional services onto SMP. We still have a strong ambition to return to monthly releases and have a strong backlog of features and functionality that we want to deliver against as well as introducing.

### Feedback

Please post what we could do better:

- Please post what we did well:

### Opportunities

- Opportunity to understand the proposed design
- Opportunity to provide instant feedback

### Enduring Auction Capability

### Questions

- What's coming in the next 2 releases
- What happens after the registration of BMUs?
