Commentary

A long market overnight into the early hours of the day, and from the late morning to the early evening. 350MW of Non-BM Fast Reserve was run over the early morning around 6:30am. Interconnector Trades were required for Margin over the late morning to midday. Trades supported overnight Voltage Control in the North West of England. Trades alleviated thermal import constraints in the South East of England over the afternoon to the evening. BM Action managed thermal export constraints in Scotland throughout the day, and in the South of England during the early afternoon.
