

Draft STCP Amendment Proposal Form

PA051

1. <u>Title of Amendment Proposal</u> Amendment to STCP 03-1 regarding Post Event Analysis and Reporting.
2. <u>Description of the Proposed Amendment</u> This Amendment Proposal seeks to change STCP 03-1 to ensure that the procedure for post Event review and recording includes Possible Relevant Interruptions as a class of Event.
3. <u>Description of Issue or Defect that Proposed Amendment seeks to Address</u> On August 4 th 2008, the STC was amended to ensure that there was an investigation and report process in place to enable parties to identify the cause of certain interruptions to User's that results in the User being disconnected from the GB Transmission System. In addition, it sought to oblige the relevant Transmission Owner to make the necessary Interruption Payments to NGET, which NGET will in turn be obliged under the CUSC to make such Interruption Payments to the affected User. To enable the obligations to be met, there needs to be a procedure in place that the parties can use to identify and investigate the potential Possible Relevant Interruptions and report on them.
4. <u>Impact on the STC</u> STCP 03-1 needs to be amended to include the fact that a Possible Relevant Interruption is classed as an Event that the review and reporting process currently described in STCP 03-1 can include.
5. <u>Impact on other frameworks e.g. CUSC, BSC</u> None
6. <u>Impact on Core Industry Documentation</u> None
7. <u>Impact on Computer Systems and Processes used by STC Parties</u> None
8. <u>Details of any Related Modifications to Other Industry Codes</u> None
9. <u>Justification for Proposed Amendment with Reference to Applicable STC Objectives</u> This amendment will better facilitate the following objectives: <ul style="list-style-type: none">(a) efficient discharge of the obligations imposed upon transmission licencees by transmission licences and the Act;(b) development, maintenance and operation of an efficient, economical coordinated system of electricity transmission; and(e) promotion of good industry practice and efficiency in the implantation and administration of the arrangements described in the STC. Following the request for compensation for an unplanned interruption to a User's equipment, this amendment proposal allows the investigation and report process to be undertaken between the relevant parties to identify which party was at fault in order that the correct party make the relevant compensation payments to NGET which in turn would be passed onto the User in accordance with the CUSC.

Notes:

1. Those wishing to propose an Amendment to the STC should do so by filling in this "Amendment Proposal Form" that is based on the provisions contained in Section 7.2 of the STC.
2. The Committee Secretary will check that the form has been completed, in accordance with the requirements of the STC, prior to submitting it to the Committee. If the Committee Secretary accepts the Amendment Proposal form as complete, then she/he will write back to the Proposer informing them of the reference number for the Amendment Proposal and the date on which the Committee will consider the Proposal. If, in the opinion of the Committee Secretary, the form fails to provide the information required in the STC, then he/she may reject the Proposal. The Committee Secretary will inform the Proposer of the rejection and report the matter to the Committee at their next meeting. The Committee can reverse the Committee Secretary's decision and if this happens the Committee Secretary will inform the Proposer.

The completed form should be returned to:
