<b>Amendment Description</b>		<b>Current status and progress</b>		
<p>CM055 is proposing amendments to STC Section B and Section J to enable the Authority to raise modifications to the STC that it considers necessary to comply with or implement the Electricity Regulation and/or any relevant legally binding decisions of the European Commission and/or Agency.</p> <p>Currently the STC has no provisions for how the Authority can raise, or direct the Licensee to raise, Modifications Proposals in order to ensure that the STC complies with the relevant Electricity Regulations and legally binding decisions from Europe. Following the implementation of the changes to Electricity Transmission Licence Standard Conditions (SLC) B12 under the Third Package, the STC requires amendment in order to be consistent with the licence changes. Therefore, the STC will need to be amended to include the following elements:</p> <ol style="list-style-type: none"><li>1. To allow the Authority to raise or direct the Licensee to raise STC Modification Proposals to implement 'Electricity Regulations' and 'any legally binding decisions from Europe</li><li>2. To apply the caveats in the licence to modifications which are raised by the <i>Authority</i> in relation to the relevant Electricity Regulations.</li><li>3. To apply the caveats in the licence to modifications which are raised by the <i>licensee</i> following an Authority direction to raise such a Proposal.</li></ol> <p>In regard to items 2 and 3 above, these caveats relate to such proposals (i) being accepted into the STC Modification process, (ii) where raised by the licensee, not to be withdrawn without the Authority's consent, and iii), to proceed in accordance with any timetable directed by the Authority.</p>		<p>CM055 was submitted to the January 2014 STC Modification Panel meeting and the Panel approved the Proposal to progress to the Assessment and Report Phase. The draft Initial Modification Report was submitted to the February 2014 STC Modification Panel and impact assessments requested. The Panel were also requested to approve CM055 to go out to Industry Consultation, to which they agreed. CM055 was issued out for Industry Consultation on 03 March 2014 and closed on 30 March 2014, with no responses being received. At the April 2014 STC Modification Panel, the Panel approved CM055 for submission to the Authority, subject to Ofgem's comments being addressed. Following further comments received from Ofgem, the Panel approved CM055 for submission to the Authority. The Modification Report was submitted for determination to the Authority on 5 June 2014. <b>On 26 June 2014, the Authority approved CM055 and it was implemented on 03 July 2014.</b></p>
