Subject: EXT || 2017 C16 consultation

Please find below ENGIE's response to the C16 consultation.

ENGIE supports the proposals set out in the consultation.

If BSC modification P354 is approved by Ofgem, additional time for the consultation on the C16 changes would be beneficial. The usual formal process only allows 28 days for consultation followed by a short time from consultation closing to submitting a report to the authority. Given the potential complexity of P354, ENGIE believes that a longer consultation period and a longer time to submit the report to the Authority are warranted.

Regards

Libby
