

## Explanation and justification of DX mod

---

- Data Exchange Modification proposal driven by Title II of SOGL – Article 40 – 53
- Primarily comprised of 2 parts;
  1. Direct\* data exchange requirements taken from SOGL (largely articles 41-53)
    - However; within these requirements there is large scope for flexibility i.e. to meet System needs inline with current framework
  2. Changes arising from the ‘All TSO’ proposal on Key Organisational Requirements, Roles & responsibilities relating to Data Exchange (KORRR)

\*Note some sections of DX have dependencies on other parts of SOGL

## Complex timeline....

---

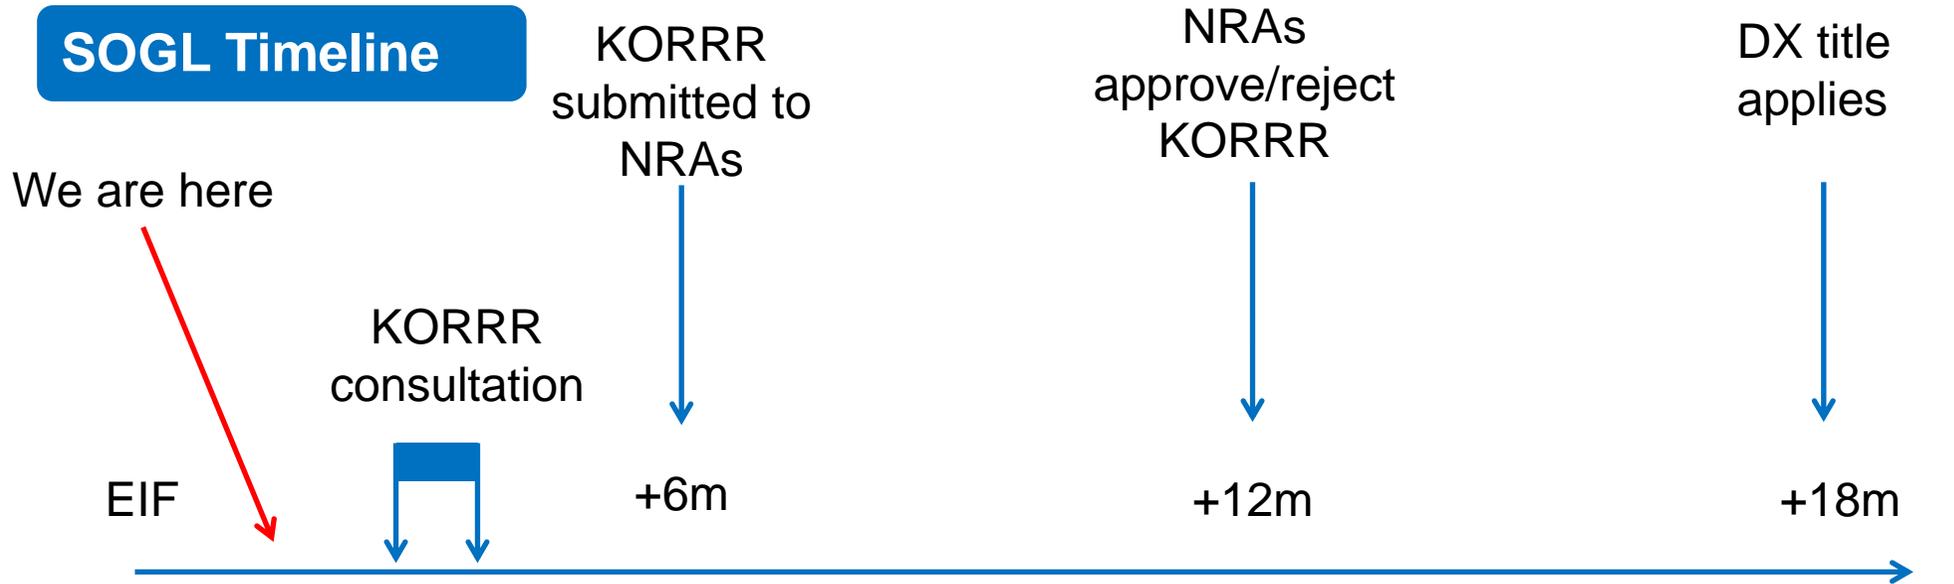

- As stated in article 192 of SOGL:

*“Articles 41 to 53 shall apply 18 months after the entry into force of this Regulation”*

- Therefore DX title overall applies from 14/3/2019
- However this time period includes regulatory approval period of up to 6 months: Article 6:(4)(b) & (9)
- The KORRR is required 6 months after EIF: 14/3/2018
  - Then also has 6 months regulatory approval period
  - Before applying along with the rest of DX Title 18m after EIF

# SOGL & Mod timeline

## SOGL Timeline

14/9/2017

14/3/2018

14/9/2018

14/3/2019

Grid Code Mod raised

solution and report submitted to Ofgem

DX Mod applies

*contingency time*

## Mod Timeline

Try to synchronise submission of Mod & KORRR (or as soon after KORRR) to Ofgem

## In Summary

---

- Now is the appropriate time to raise mode;
  - KORRR draft becomes publically available for assessment
  - Still sufficient time to develop and implement mod
  - Approval can be considered in parallel (with KORRR) by Ofgem
- Cannot wait until KORRR is finalised as does not leave sufficient time
- Mod proposal is 'work in progress' until we have full assessment of KORRR

Parallel working with alongside ENC Methodology/proposal development, whilst more complex, is necessary

---

- Panel is asked to:
  - Agree that this modification will have a material impact and therefore requires an Authority decision
  - Agree that this modification should be developed by a Workgroup
  - Agree that if yes to the question above that these discussions are held on Workgroup day (2 November 2017 for initial meeting)
  - Agree that the timetable for this modification should be developed with the Workgroup at the initial meeting – reporting back to the November Panel meeting
  - Agree the Terms of Reference for the modification
