

ESO Incentives Industry Update

Managing system balancing and operability

Principle 1

Support market participants to make informed decisions by providing user friendly, comprehensive and accurate information

Principle 2

Drive overall efficiency and transparency in balancing, taking into account impacts of ESO actions across time horizons

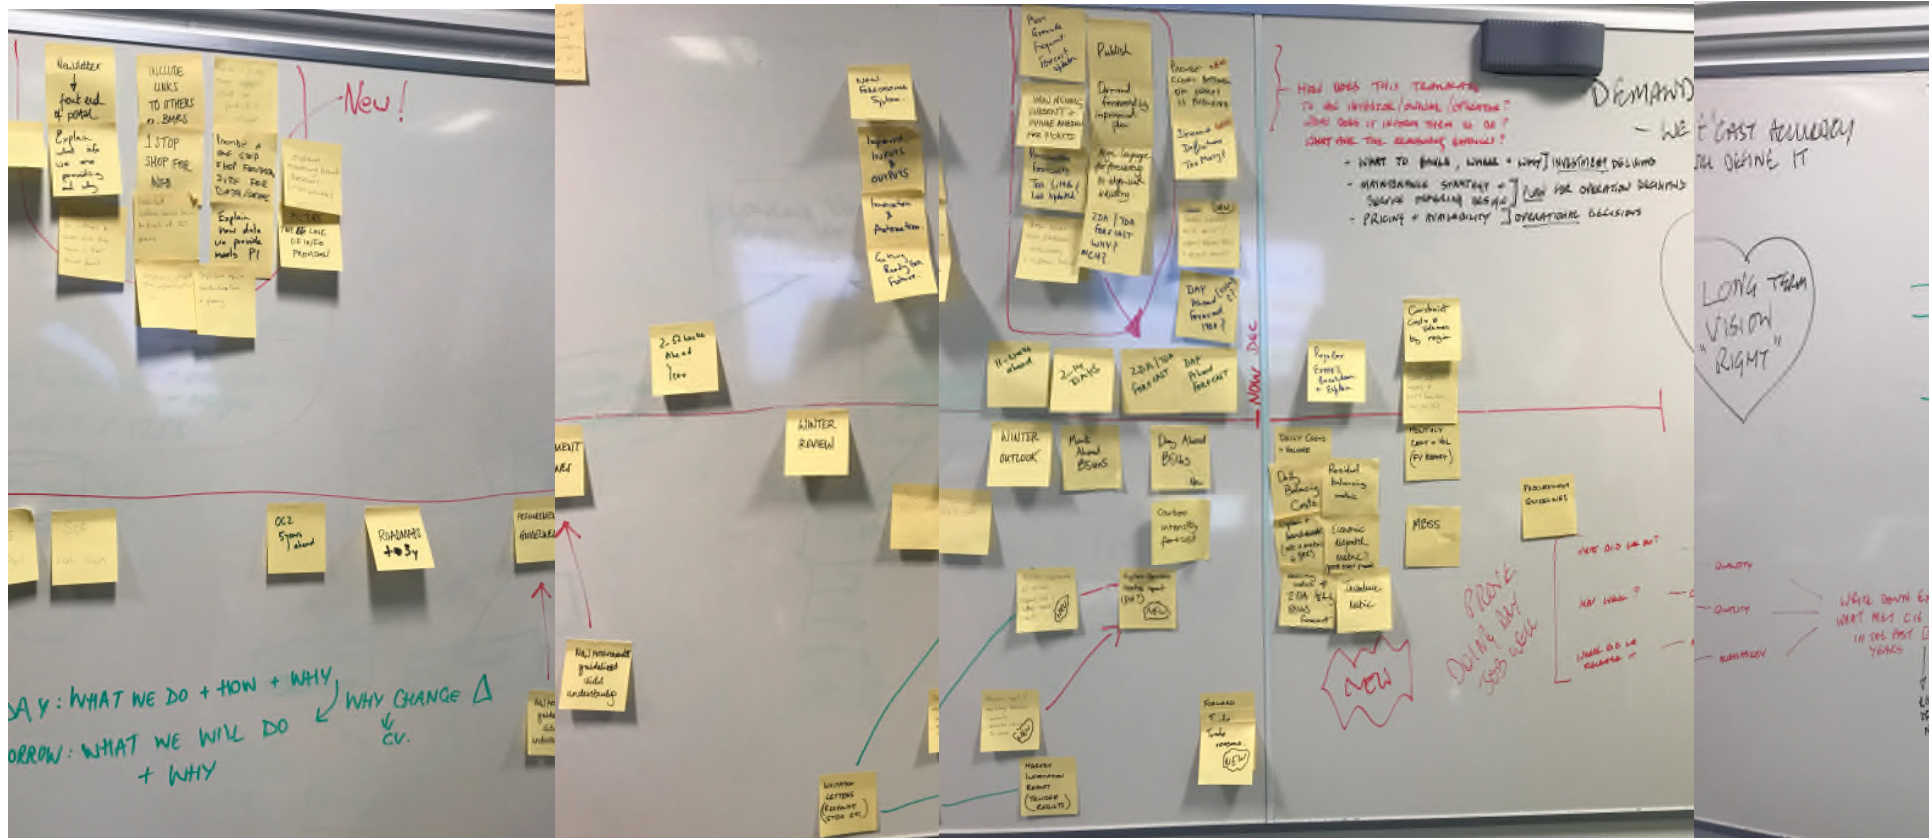

Principle 1: reframing our thinking...

Three barriers' to meeting our vision:

1. The range of information that met past needs will not be sufficient (or may be superfluous) to meet future needs.
2. The frequency and accuracy of information provision was right for the past, but is not fit for the future.
3. There are too many avenues of information provision which create a complexity barrier to achieving the vision.

There are too many avenues of information provision which create a complexity barrier to achieving the vision

Your Views

We would like to hear your views on our vision, plans and deliverables.
